Where statements of conformity are made in this report, the following decision rules are applied;

PASS: Result $\pm$ expanded uncertainty within the limits/specifications

FAIL: Result $\pm$ expanded uncertainty exceeds the limits/specifications

Conditionally Pass/Fail: Result $\pm$ expanded uncertainty overlaps the limits/specifications

Expanded uncertainty is calculated with confidence level = 95% and K=2

The above test results are only applicable to the sample (s) referred above. This report shall not be reproduced except in full, without the written approval of METS laboratory.
